EDUCATION

BS in Artificial Intelligence **Expected Graduation – 2027**
Technische Hochschule Deggendorf (THD), Deggendorf, Germany

Course works: Speech Recognition, NLP, RNN, Transformers, GAN, Cloud computing, RAG, Multi Agent Systems, AI workflow, Generative AI Frameworks

WORK/EXPERIENCES

Data Science Intern | Daimler Truck AG | Stuttgart **Oct 2025 – Present**

- Built Data Quality Monitoring System using ML and Statistical Methods.
- Architected Data Quality Metrics and KPIs within ETL pipeline processing 100K+ vehicle telematics datasets.
- Performed Big Data Analytics and created Data Visualization with Databricks Dashboard and Power BI
- Maintained Internal library codes, tests, pipelines

Student Research Assistant | THD | Deggendorf **Apr 2024 – Mar 2026**

- Participated in AI and ML research projects.
- Experimented with diverse Transformation and Feature Extraction techniques on data collected from robots / edge devices
- Engineered scalable MLOps pipeline for large scale Time Series Data.
- Developed CNN based Computer vision models for Industrial Sorting Line Prototype (FischerTechnik Industrie 4.0 and Sorting Line)
- Developed GAN based synthetic data generation pipeline to create realistic electronic signal datasets
- Documented and made Data Analysis and Model Performance Reports.

Student Teaching Assistant | THD | Deggendorf **Oct 2024 – Sep 2025**

- Coded in LaTeX to create documents, presentations and converted the existing documents to a LaTeX format.
- Collaborated with the teams of Professors and Students to enhance teaching materials.

TECHNICAL SKILLS

- Python, OOP, OpenCV, TensorFlow, PyTorch, Matplotlib, Pandas, Pyspark, Numpy, Scikit-learn, Nltk, getML, Dask
- Databricks, Apache Spark, Jupyter Notebook, Google Collab, Kaggle, Snowflake
- HTML, CSS, JavaScript, Express, React, Three.js
- CI/CD, GitHub, Gitlab, Docker, AWS, Azure DevOps, Jira
- C/C++, Micro-Python with Arduino, Esp32, Raspberry Pi
- SQL, Postgresql, FastAPI, MCP
- R and R studio, PowerBI, Databricks Dashboard
- Linux (Ubuntu), PowerShell, Bash
- Hugging face, Ollama, LangChain, LangGraph, N8n
- LaTeX, BibTeX, Citavi, Overleaf
- Microsoft Azure AI Studio, Google AI Studio

LANGUAGES

- English: Full Professional Proficiency
- Nepali: Native speaker
- German: Limited Working Proficiency

PROJECTS

- Titanic Survival Prediction App | React, Docker, Python
  Full Stack Web App that predicts user's chance of survival in Titanic using various ML models.
- Autonomous Vehicles System | PyTorch, Nvidia-JetRacer
  Object detection based system for traffic management of autonomous vehicles
- 3D Portfolio | React , Three.js , Express , Next.js
  My Portfolio Project – https://aadityaneupane.com
- Stroke Predictor and Chatbot Web App | Rasa, Streamlit, Html, CSS
  NLU based Recommendation system and web app to predict user's chance of having a stroke
- Quality Assurance with AI | TensorFlow, TFlite, OpenCV
  Improved inference time and accuracy of model for FischerTechnik Sorting Line
- Chatbot for University Canteen | Python, Express, Socket.io, Azure
  Chatbot for University Canteen based on the Weekly Canteen Menu.
- Spam Filter | Matplotlib, Pandas, NumPy, Scikit-learn, NLTK
  A machine learning based classification method to filter Spam emails.
- Anti Distraction Extension | JavaScript, Html, Css
  Chrome Extension that Replaces Distractive videos on YouTube with a Motivational Phrase "Study hard".
- AI Presentation Generator | N8n, Gemini Flash, Streamlit, Unsplash
  A N8n workflow and a Streamlit app that turns a given topic into a PowerPoint presentation, which won the hackathon.

COMMUNITY INVOLVEMENT

Gesellschaft für Informatik, *Member* **Jan 2024 – Present**
University Clubs: Chess, Swimming **Oct 2023 - Present**
